Stools & Benches

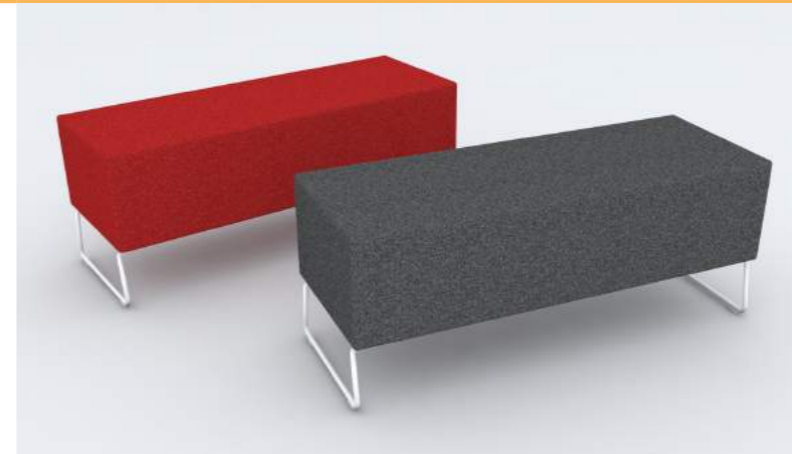

Stools & Benches

Stools & Benches

Beam

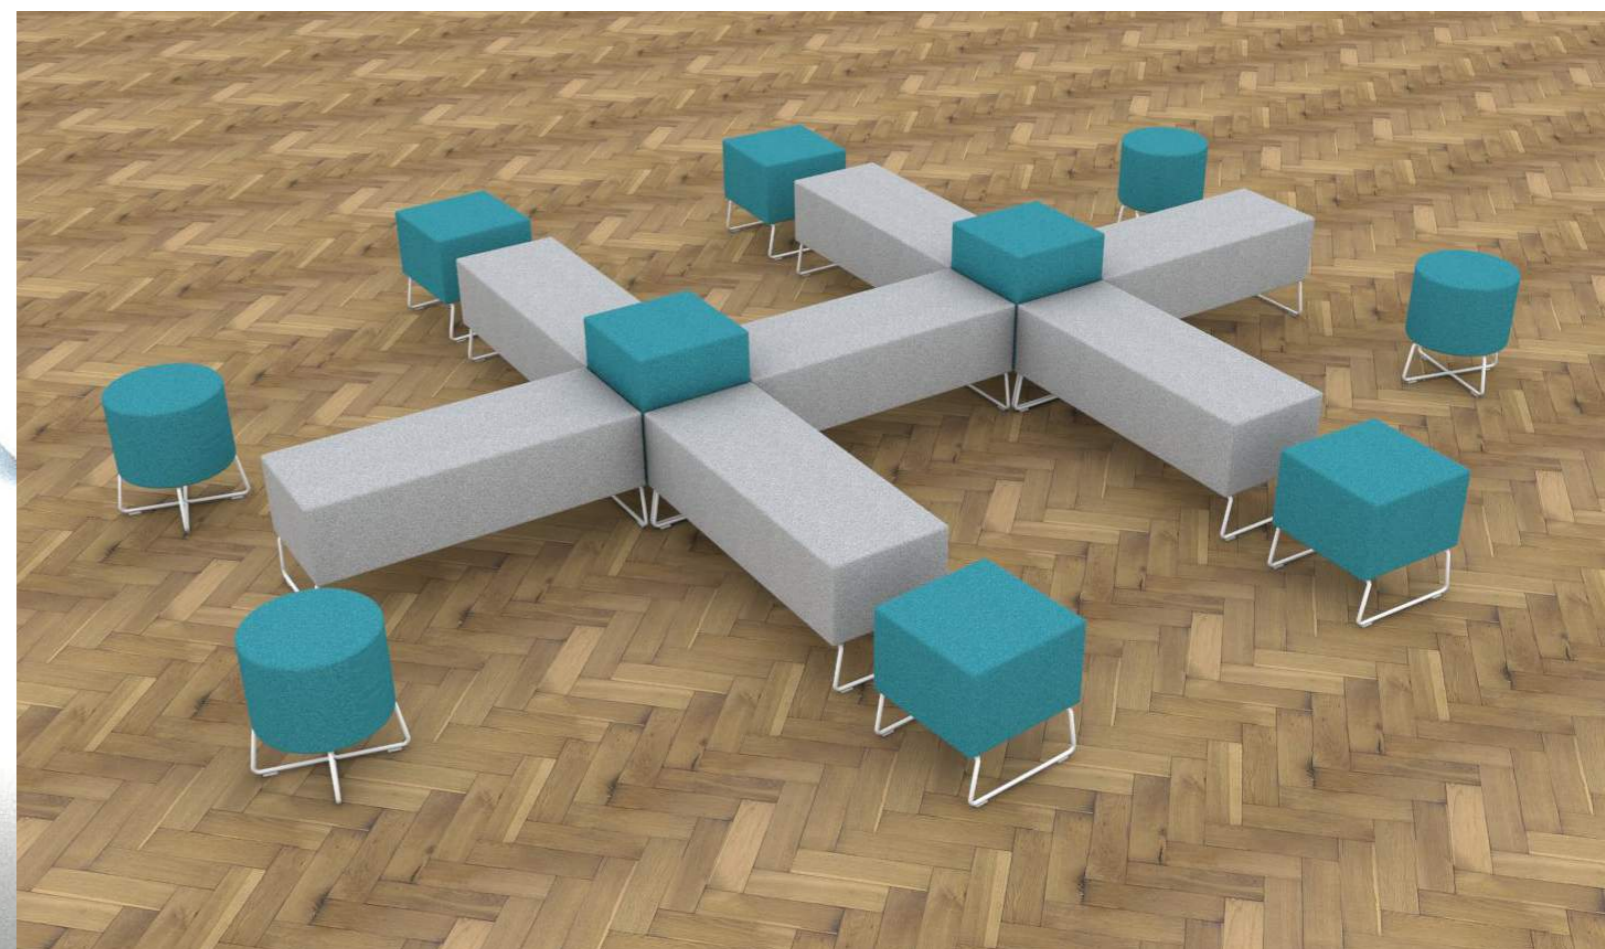

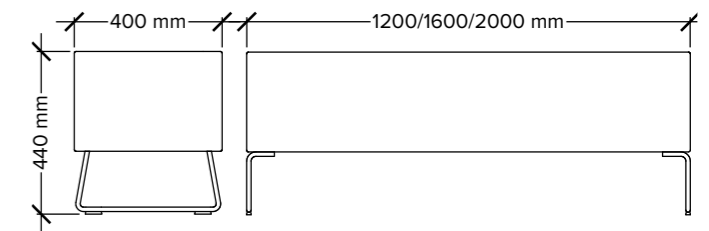

Our range of stools and benches are ideal for creating casual seating spaces within breakout areas, receptions and atriums.

Alongside larger seating arrangements, stools can be a great way to increase seating capacity, and grant users the freedom to move and reconfigure their space to suit their needs.

Beam is a range of casual breakout benches and stools designed to compliment our flagship Lagoon range, or to stand alone in their own right.

With a mix of different bench sizes, different stool heights and a choice between White and Satin Silver frames, the Beam range offers freedom to create seating for all kinds of spaces.

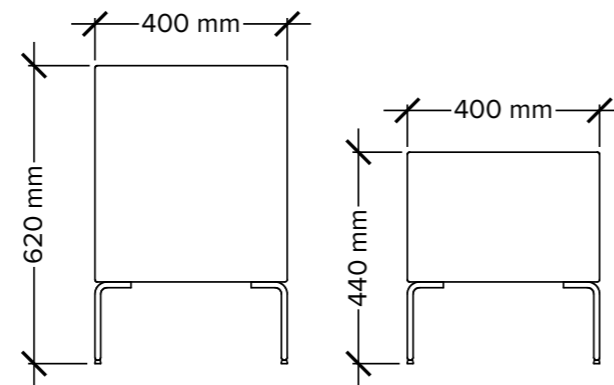

Beam Blocs

Beam Bloc stools are designed to compliment the Lagoon range, but look great individually too.

Scatter Blocs around, to create a free and fluid seating space; or use them in conjunction with Beam benches as connecting pieces, to create limitless shapes and sizes.

Blocs are available with a wide range of upholstery options, as well as a choice of White or Satin Silver frames.

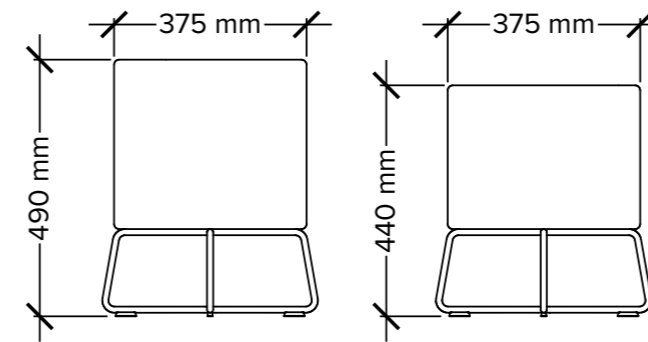

Beam Props

Beam Props are great placed around larger seating configurations, or on their own around coffee tables to create a casual breakout space.

Available in a wide range of upholstery materials, and with an option of White or Satin Silver base frames, Props are designed to compliment our Lagoon and Beam ranges.

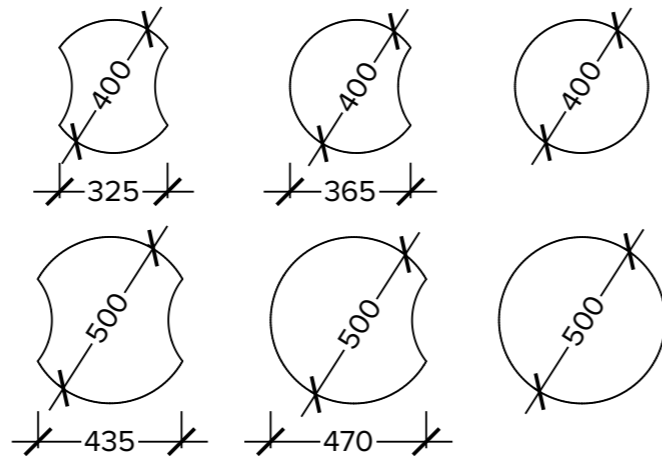

Bits & Bites

Bits & Bites are lightweight and freely-movable, and can interlink to create novel seating configurations for creative spaces and break-out areas.

We've split the range into two different heights – 400mm and 470mm – to allow for even more creative license when it comes to planning your space.

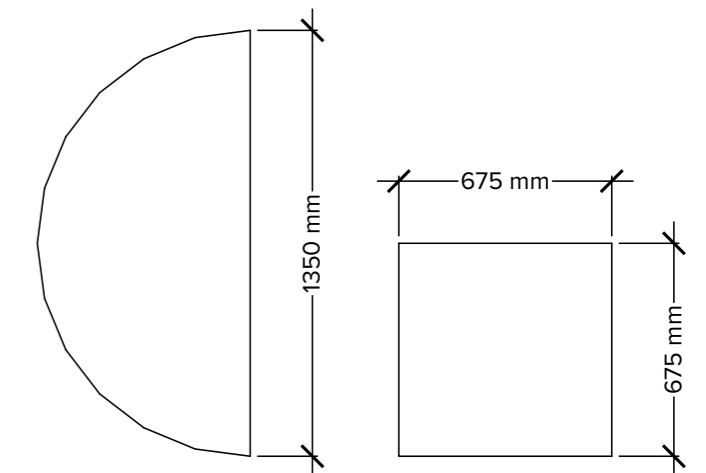

Lagoon Bench Modules

Lagoon Bench Modules are a part of the wider Lagoon range, so are perfect for use amongst other furniture in this range.

Also use these modules to create defining free-standing seats, which will look great in receptions, atriums and breakout spaces.

Available with a wide range of upholstery options, as well as with White or Satin Silver wire legs.
